The notified proposal is amended by our decision as follows.

Text that is highlighted grey indicates Stage 1 and 2 text and is not the subject of this decision. Greyed out text incorporates requests for minor corrections for which a decision has been issued.

Where the decision text from earlier decisions is the same as, or equivalent to, a Central City Residential provision, it is shown in black text.

Text in blue is the decision text for the Central City proposal only.

Please note, to ensure clarity and certainty of provisions, and consistency with the Plan's drafting style, a number of changes have been made to our earlier decisions. These changes are not identified as it has not been practical to do so.

Chapter 14 - Residential

14.0 Introduction

This introduction is to assist the lay reader to understand how this chapter works and what it applies to. It is not an aid to interpretation in a legal sense.

The provisions in this chapter give effect to the Chapter 3 Strategic Direction Objectives.

This chapter relates to residential, community, and where appropriate, small scale commercial activities that occur within new and existing residential areas throughout the District. Objectives, policies, rules, standards and assessment criteria provide for these activities in each of the residential zones identified in this chapter.

This chapter seeks to manage the scale and character of new development in the residential areas in accordance with the strategic approach to development in Greater Christchurch, including provision for both greenfields development and intensification, particularly around Key Activity Centres and the Central City.

14.1 Objectives and policies

14.1.1 Objective - Housing supply

- a. An increased supply of housing that will:
 - i. enable a wide range of housing types, sizes, and densities, in a manner consistent with Objectives 3.3.4(a) and 3.3.7;
 - ii. meet the diverse needs of the community in the immediate recovery period and longer term, including social housing options; and
 - iii. assist in improving housing affordability.

14.1.1.1 Policy - Housing distribution and density

- a. Provide for the following distribution of different areas for residential development, in accordance with the residential zones identified and characterised in Table 14.1.1.1a, in a manner that ensures:
 - i. new urban residential activities only occur in existing urban areas or in greenfield priority areas identified in Map A of the Canterbury Regional Policy Statement;
 - ii. high density residential development in the Central City, that achieves an average net density of at least 50 households per hectare for intensification development;
 - iii. medium density residential development in and near identified commercial centres in existing urban areas where there is ready access to a wide range of facilities, services, public transport, parks and open spaces, that achieves an average net density of at least 30 households per hectare for intensification development;
 - iv. a mix of low and medium residential density development in greenfield neighbourhoods, that achieves a net density (averaged over the Outline development plan) of at least 15 households per hectare;

- v. greenfield land that is available for further residential development up to 2028;
- vi. low density residential environments in other existing suburban residential areas, in the residential areas of Banks Peninsula, and in small settlements are maintained, but limited opportunities are provided for smaller residential units that are compatible with the low density and township suburban environment; and
- vii. within Banks Peninsula, limited low density residential development adjacent to existing residential townships and small settlements, that complements the surrounding environment, is able to be efficiently serviced by public infrastructure and in some limited circumstances private infrastructure; and is in locations not subject to significant risks to life safety and property damage from natural hazards.

Table 14.1.1.1a

Residential Suburban Zone	<p>Provides for the traditional type of housing in Christchurch in the form of predominantly single or two storeyed detached or semi-detached houses, with garage, ancillary buildings and provision for gardens and landscaping.</p> <p>The changing demographic needs and increasing demand for housing in Christchurch are provided for through a range of housing opportunities, including better utilisation of the existing housing stock. A wider range of housing options will enable a typical family home to be retained, but also provide greater housing stock for dependent relatives, rental accommodation, and homes more suitable for smaller households (including older persons).</p>
Residential Suburban Density Transition Zone	<p>Covers some inner suburban residential areas between the Residential Suburban Zone and the Residential Medium Density Zone, and areas adjoining some commercial centres.</p> <p>The zone provides principally for low to medium density residential development. In most areas there is potential for infill and redevelopment at higher densities than for the Residential Suburban Zone.</p>
Residential Medium Density Zone	<p>Located close to the central City and around other larger commercial centres across the city. The zone provides a range of housing options for people seeking convenient access to services, facilities, employment, retailing, entertainment, parks and public transport.</p> <p>The zone provides for medium scale and density of predominantly two or three storey buildings, including semi-detached and terraced housing and low-rise apartments, with innovative approaches to comprehensively designed, high quality, medium density residential development also encouraged.</p> <p>Residential intensification is anticipated through well-designed redevelopments of existing sites, and more particularly through comprehensive development of multiple adjacent sites. Zone standards and urban design assessments provide for new residential development that is attractive, and delivers safe, secure, private, useable and well landscaped buildings and settings.</p>
Residential Central City Zone	<p>Located within the central city, the Residential Central City Zone has been developed to contribute to Christchurch's liveable city values. Providing for a range of housing types, including attractive, high density living opportunities, the zone utilises the potential for living, working and playing in close proximity to the commercial centre of the city. The character, scale and intensity of non-residential activities is controlled in order to mitigate effects on the character and amenity of the inner city residential areas.</p>
Residential New Neighbourhood Zone	<p>The Residential New Neighbourhood Zone generally includes new areas of greenfield land where large-scale residential development is planned. The zone will allow a wide range of residential house types and section sizes to provide for a wide spectrum of household sizes and affordable housing. Families will therefore be able to remain within the neighbourhood throughout their lifetime as they move to housing types that suit their life stage. These areas are intended to achieve higher overall residential densities than traditionally achieved in suburban developments.</p>
Residential Banks Peninsula Zone	<p>Includes urban and suburban living, commuter accommodation and the small harbour settlements.</p>

Residential Suburban Zone	<p>Provides for the traditional type of housing in Christchurch in the form of predominantly single or two storeyed detached or semi-detached houses, with garage, ancillary buildings and provision for gardens and landscaping.</p> <p>The changing demographic needs and increasing demand for housing in Christchurch are provided for through a range of housing opportunities, including better utilisation of the existing housing stock. A wider range of housing options will enable a typical family home to be retained, but also provide greater housing stock for dependent relatives, rental accommodation, and homes more suitable for smaller households (including older persons).</p>
	<p>The zone includes the settlements of Lyttelton and Akaroa which each have a distinctive urban character. Lyttelton has a more urban atmosphere and a distinct urban-rural boundary. The residential areas are characterised by small lot sizes and narrow streets. Akaroa is a smaller settlement characterised by its historic colonial form and architecture, relatively narrow streets, distinctive residential buildings and well-treed properties. Akaroa is a focal point for visitors to the region and the district. The character of these two settlements is highly valued and the District Plan provisions seek to retain that character. Opportunities for residential expansion around Lyttelton and Akaroa are constrained by the availability of reticulated services and land suitability.</p> <p>The smaller settlements around Lyttelton harbour provide a variety of residential opportunities. Residential areas at Cass Bay, Corsair Bay, Church Bay and Diamond Harbour offer a lower density residential environment with relatively large lots. Each settlement differs as a reflection of its history, the local topography, the relationship with the coast and the type of residential living offered.</p> <p>Non-residential activities that are not compatible with the character of the Residential Banks Peninsula Zone are controlled in order to mitigate adverse effects on the character and amenity of the area.</p>
Residential Hills Zone	<p>Covers all the living environments that are located on the slopes of the Port Hills from Westmorland in the west to Scarborough in the east. It provides principally for low density residential development that recognises the landscape values of the Port Hills, including opportunities for planting and landscaping, and control of reflectivity of roof finishes in order to blend buildings into the landscape. Provision is made for a range of housing options that will enable a typical family home to be retained, but also provide greater housing stock for dependent relatives, rental accommodation, and homes more suitable for smaller households (including older persons). Provision is also made for a range of appropriate non-residential activities.</p>
Residential Large Lot Zone	<p>Covers a number of areas on the Port Hills where there is an existing residential settlement that has a predominantly low density or semi-rural character as well as the Akaroa Hillslopes and rural residential areas of Samarang Bay and Allandale on Banks Peninsula.</p>
Residential Small Settlement	<p>Covers the many small settlements on Banks Peninsula, as well as the settlements of Kainga and Spencerville to the north of Christchurch. Lot sizes within the settlements are typically larger than urban areas reflecting their existing character and providing a lower density semi-rural living environment, with the exception of Kainga, where smaller lots are provided for. New development is consolidated in and around existing settlements. Control of roof reflectivity seeks to blend buildings into the rural landscape.</p> <p>Non-residential activities that are not compatible with the character of the settlements are controlled in order to mitigate adverse effects on amenity and the environment of the settlements.</p>
Residential Back Zone	<p><i>Deferred to Coastal Environment Hearing</i></p>

- a. Provide for a diverse range of independent housing options that are suitable for the particular needs and characteristics of older people throughout residential areas.
- b. Provide for comprehensively designed and managed, well-located, higher density accommodation options and accessory services for older people and those requiring care or assisted living, throughout all residential zones.
- c. Recognise that housing for older people can require higher densities than typical residential development, in order to be affordable and, where required, to enable efficient provision of assisted living and care services.

Note: This policy also implements Objective 14.1.2

14.1.1.9 Policy – Monitoring

- a. Evaluate the effectiveness of the District Plan's residential provisions by monitoring the supply of additional housing through residential intensification, greenfield and brownfield development (including housing types, sizes and densities), and its contribution to:
 - i. meeting regional growth targets for greater Christchurch in the Land Use Recovery Plan and the Canterbury Regional Policy Statement;
 - ii. achieving an additional 23,700 dwellings by 2028 (Objective 3.3.4(a));
 - iii. meeting the diverse and changing population and housing needs for Christchurch residents, in the immediate recovery period and longer term;
 - iv. improving housing affordability; and
 - v. meeting the housing intensification targets specified in Objective 3.3.7(d).

- b. Undertake the monitoring and evaluation at such intervals as to inform any other monitoring requirements of other statutory instruments, and make the results publicly available.
- c. Have regard to the information from this monitoring when determining priority areas for residential intensification and provision for new and upgraded infrastructure.

14.1.2 Objective – Short term residential recovery needs

- a. Short-term residential recovery needs are met by providing opportunities for:

- a. Provide for and incentivise a range of additional housing opportunities to meet short term residential recovery needs through redevelopment and additions to the existing housing stock and/or vacant land, that:
 - i. are appropriately laid out and designed to meet the needs of current and future residents; and
 - ii. avoid significant adverse effects on the character or amenity of existing residential areas.

14.1.2.2 Policy – Recovery housing - higher density comprehensive redevelopment

- a. Enable and incentivise higher density comprehensive development of suitably sized and located sites within existing residential areas, through an Enhanced development mechanism which provides:
 - i. high quality urban design and onsite amenity;
 - ii. appropriate access to local services and facilities;
 - iii. development that is integrated with, and sympathetic to, the amenity of existing neighbourhoods and adjoining sites; and

14.1.6.6 Policy – Memorial Avenue and Fendalton Road

- a. Maintain the war memorial and visitor gateway roles of Memorial Avenue and Fendalton Road and their very high amenity values, by limiting the establishment of non-residential activities and associated outdoor advertising and vehicle parking on sites in residential zones with frontage to these roads.

14.14 Rules – Matters of control and discretion

When considering applications for controlled activities, the Council's power to impose conditions on the consent is restricted to the matters over which control is reserved in the relevant rule and as set out for that matter below.

When considering applications for restricted discretionary activities, the Council's power to decline consent, or to grant consent and impose conditions, is restricted to the matters over which discretion is restricted in the relevant rule and as set out for that matter below.

14.14.1 Residential design principles

New developments shall be assessed against the six residential design principles a.-f. set out below. Each residential design principle is accompanied by relevant considerations which are a guide to applicants and consent officers when considering an application against the residential design principles themselves.

The relevance of the considerations under each residential design principle will vary from site to site and, in some circumstances, some of the considerations may not be relevant at all. For example, a.ii. is likely to be highly relevant to a development adjacent to heritage buildings; whereas a.ii. might be less relevant to a development in an area void of heritage buildings.

City context and character

- a. Whether the design of the development is in keeping with, or complements, the scale and character of development anticipated for the surrounding area and relevant significant natural, heritage and cultural features.

The relevant considerations are the extent to which the development:

- i. includes, where relevant, reference to the patterns of development in and/or anticipated for the surrounding area such as building dimensions, forms, setbacks and alignments, and secondarily materials, design features and tree plantings; and
- ii. retains or adapts features of the site that contribute significantly to local neighbourhood character, potentially including existing heritage buildings, site contours and mature trees.

Relationship to the street and public open spaces

- b. Whether the development engages with and contributes to adjacent streets, and any other adjacent public open spaces to contribute to them being lively, safe and attractive.

The relevant considerations are the extent to which the development:

- i. orientates building frontages including entrances and windows to habitable rooms toward the street and adjacent public open spaces;
- ii. designs buildings on corner sites to emphasise the corner; and
- iii. avoids street facades that are blank or dominated by garaging.

Built form and appearance

- c. Whether the development is designed to minimise the visual bulk of the buildings and provide visual interest.

The relevant considerations are the extent to which the development:

- i. subdivides or otherwise separates unusually long or bulky building forms and limits the length of continuous rooflines;
- ii. utilises variety of building form and/or variation in the alignment and placement of buildings to avoid monotony;
- iii. avoids blank elevations and facades dominated by garage doors; and
- iv. achieves visual interest and a sense of human scale through the use of architectural detailing, glazing and variation of materials.

Residential amenity

- d. In relation to the built form and residential amenity of the development on the site (i.e. the overall site prior to the development), whether the development provides a high level of internal and external residential amenity for occupants and neighbours.

The relevant considerations are the extent to which the development:

- i. provides for outlook, sunlight and privacy through the site layout, and orientation and internal layout of residential units;
- ii. directly connects private outdoor spaces to the living spaces within the residential units;
- iii. ensures any communal private open spaces are accessible, usable and attractive for the residents of the residential units; and
- iv. includes tree and garden planting particularly relating to the street frontage, boundaries, accessways, and car parking.

Access, parking and servicing

- e. Whether the development provides for good access and integration of space for parking and servicing.

The relevant considerations are the extent to which the development:

- i. integrates access in a way that is safe for all users, and offers convenient access for pedestrians to the street, any nearby parks or other public recreation spaces;
- ii. provides for car parking and garaging in a way that does not dominate the development, particularly when viewed from the street or other public open spaces; and
- iii. provides for suitable storage and service spaces which are conveniently accessible, safe and/or secure, and located and/or designed to minimise adverse effects on occupants, neighbours and public spaces.

Safety

- f. Whether the development incorporates Crime Prevention Through Environmental Design (CPTED) principles as required to achieve a safe, secure environment.

The relevant considerations are the extent to which the development:

- i. provides for views over, and passive surveillance of, adjacent public and publicly accessible private open spaces;
- ii. clearly demarcates boundaries of public and private space;
- iii. makes pedestrian entrances and routes readily recognisable; and
- iv. provides for good visibility with clear sightlines and effective lighting.

Hillside and small settlement areas

- g. Whether the development maintains or enhances the context and amenity of the area.

The relevant considerations are the extent to which the development:

- i. maintains significant and distinctive landforms, geological features, water bodies and courses, indigenous and exotic vegetation, coastal margins and the habitat of indigenous fauna;
- ii. has regard to and protects historic heritage from inappropriate subdivision use and development, and recognizes the relationship of Ngāi Tahu manawhenua with their ancestral lands, water, sites of cultural significance and other taonga, including access to mahinga kai and sites of cultural significance;
- iii. is designed and located in a way that reduces dominance of buildings and structures;
- iv. incorporates environmentally sustainable and low impact subdivision, site and building design;
- v. responds to the qualities that are distinct and unique to each small settlement; and
- vi. where appropriate and possible, maintains views from properties.

14.14.2 Site density and site coverage

- a. Whether the non-compliance is appropriate to its context taking into account:
 - i. whether the balance of open space and buildings will maintain the character anticipated for the zone;
 - ii. any visual dominance of the street resulting from a proposed building's incompatible scale;
 - iii. any loss of opportunities for views in the Residential Banks Peninsula Zone; and
 - iv. the proportion of the building scale in relation to the proportion of the site.

14.14.3 Impacts on neighbouring property

- a. Whether the increased height, reduced setbacks, or recession plane intrusion would result in buildings that do not compromise the amenity of adjacent properties taking into account:
 - i. overshadowing of adjoining sites resulting in reduced sunlight and daylight admission to internal and external living spaces beyond that anticipated by the recession plane, and where applicable the horizontal containment requirements for the zone;
 - ii. any loss of privacy through being overlooked from neighbouring buildings;

- iii. whether development on the adjoining site, such as large building setbacks, location of outdoor living spaces, or separation by land used for vehicle access, reduces the need for protection of adjoining sites from overshadowing;
- iv. the ability to mitigate any adverse effects of increased height or recession plane breaches through increased separation distances between the building and adjoining sites, the provision of screening or any other methods; and
- v. within a Flood Management Area, whether the recession plane infringement is the minimum necessary in order to achieve the required minimum floor level.

14.14.4 Minimum unit size and unit mix

- a. When considering under sized units, whether the reduced unit size is appropriate taking into account:
 - i. the floorspace available and the internal layout and their ability to support the amenity of current and future occupants;
 - ii. other onsite factors that would compensate for a reduction in unit sizes e.g. communal facilities;
 - iii. scale of adverse effects associated with a minor reduction in size in the context of the overall residential complex on the site; and
 - iv. needs of any social housing tenants.

14.14.5 Scale of activity

 - i. the compatibility of the scale of the activity and the proposed use of the buildings with the scale of other buildings and activities in the surrounding area;
 - ii. the ability for the locality to remain a predominantly residential one; and
 - iii. the appropriateness of the use in meeting needs of residents principally within the surrounding living environment.
- b. The adverse effects of additional staff, pedestrian and traffic movements during the intended hours of operation on:
 - i. the character of the surrounding living environment; and
 - ii. noise, disturbance and loss of privacy of nearby residents.
- c. For home occupations, whether the non-compliance is an integral and necessary part of the home occupation.
- d. For residential units with more than 6 bedrooms, whether there should be a limit on the number of bedrooms over 6 bedrooms based on the impact on the surrounding neighbourhood and residential character.
- e. The ability to avoid, remedy or appropriately mitigate any adverse effects of the extended hours of operation; and other factors which may reduce the effect of the extended hours of operation, such as infrequency of the activity or limited total hours of operation.
- f. The opportunity the activity provides to support an existing nearby commercial centre.

- g. The opportunity the activity provides to support and compliment any existing health related or community activities in the surrounding area.

14.14.6 Traffic generation and access safety

- a. Whether the traffic generated is appropriate to the residential character, amenity, safety and efficient functioning of the access and road network taking into account:
- i. in the case of effects on residential character and amenity:
 - A. any adverse effects in terms of noise and vibration from vehicles entering and leaving the site or adjoining road, and their incompatibility with the noise levels acceptable in the respective living environments;
 - B. any adverse effects in terms of glare from headlights of vehicles entering and leaving the site or adjoining road on residents or occupants of adjoining residential sites;
 - C. any reduction in the availability of on-street parking for residents, occupants or visitors to adjoining residential sites to the point that it becomes a nuisance;
 - D. any adverse effects in terms of fumes from vehicles entering or leaving the site, on residents or occupiers of adjoining residential sites; and
 - E. the ability to mitigate any adverse effects of the additional traffic generation such as through the location and design of vehicle crossings, parking and loading areas or through the provision of screening and other factors that will reduce the effect of the additional traffic generation, such as infrequency of the activity, or limited total time over which the traffic movements occur; and
 - ii. in the case of the safe and efficient functioning of the road network:
 - A. any cumulative effect of traffic generation from the activity in conjunction with traffic generation from other activities in the vicinity;
 - B. adverse effects of the proposed traffic generation on activities in the surrounding living environment;
 - C. consistency of levels of traffic congestion or reduction in levels of traffic safety with the classification of the adjoining road;
 - D. the variance in the rate of vehicle movements throughout the week and coincidence of peak times with peak traffic movements on the wider network; and

Inlets and outlets for passive and mechanical ventilation systems, and ventilation ductwork, are to be designed to incorporate acoustic insulation to ensure that the acoustic performance of the building facade achieves a minimum noise reduction consistent with the relevant rules. 2. In determining the insulation performance of roof/ceiling arrangements, roof spaces are assumed to have no more than the casual ventilation typical of the jointing, capping and guttering detail used in normal construction.
